EDUCATION

Institute Of Infrastructure Technology Research and Management University
Bachelor of Technology - Computer Engineering

Ahmedabad,India
November 2022 - June 2026

SKILLS SUMMARY

- **Languages:** Java, Python, JavaScript, C, C++
- **Frontend:** React, HTML5, CSS3, Tailwind, Bootstrap
- **Backend:** Spring Boot, REST APIs, MVC, Thymeleaf
- **Databases:** MySQL, PostgreSQL, MS SQL Server
- **Libraries:** TensorFlow, Pandas
- **Tools:** Git, WordPress, Figma, Canva
- **Core Concepts:** DSA, OOP, OS, Computer Networks

WORK EXPERIENCE

Python Developer Intern

Evanti Tech

Mumbai,India

- Developed Python automation scripts that reduced manual operational effort by ~30%
- Built data processing and reporting tools using Pandas and Python standard libraries
- Automated routine tasks improving execution speed and reliability.

Software Engineer Intern

IPS Limited

Remote

London, UK

- Contributed to full-stack development using Spring Boot (MVC), implementing controllers, services, repositories, and MySQL-based data persistence.
- Developed REST APIs and supported frontend integration for end-to-end application flow.
- Fixed bugs and improved existing backend code to enhance performance and stability.

PROJECTS

Ecommerce web Application

May 2024-July 2024

Tech: Java, Spring Boot, Thymeleaf, MySQL

- Architected and developed a full-stack e-commerce platform supporting product catalog, cart, order processing, and secure authentication.
- Designed normalized MySQL schemas for users, inventory, and transactions, ensuring data consistency and efficient queries.
- Enforced server-side validation and business rules to maintain data integrity across checkout and order workflows.
- Integrated payment workflows and delivered a responsive, user-centric UI with emphasis on reliability and usability.

Real-Time Social Media Platform (Twitter Application)

May 2025- July 2025

Tech: Java, Spring Boot, React, JavaScript, MySQL

- Engineered a full-stack social media platform with authentication, user profiles, and dark/light theme support.
- Implemented core social features including post creation, likes, comments, retweets, and emoji interactions.
- Developed RESTful APIs optimized for high-frequency read/write operations, focusing on performance and scalability.
- Improved frontend responsiveness through clean state management and enhanced backend performance via optimized database queries.

AI-Powered Autonomous Observability Platform

May 2025 – Present

Tech: Python, Flask, React, WebSockets, Scikit-Learn, Prometheus, Grafana

- Built an AI-powered observability platform that predicts service failures, detects anomalies, performs root cause analysis, and monitors SLA/SLO compliance in real time
- Designed dependency intelligence, cascade failure detection, self-healing recommendations, incident replay, and live operational dashboards for distributed applications.

Json<-> XML parser

Jan 2024-March 2024

Tech: Python, antlr

- Built a bidirectional JSON ↔ XML parser supporting structured data conversion with pretty printing and input cleaning.
- Implemented schema validation and robust error handling using an error listener to detect and report parsing issues.

Certifications

Virtual Experiences:

Deloitte – Technology Job Simulation [\[Link\]](#)

Jan 2025

- Completed hands-on tasks across software development, data analysis, and cybersecurity, simulating real workflows.

Accenture – Developer Job Simulation [\[Link\]](#)

Dec 2023

- Worked on architecture design, debugging, unit testing, and UAT, following secure SDLC practices.

KPMG in the UK – Forage [\[Link\]](#)

July 2024

- Completed hands-on job simulation in Cyber, Data Analytics, Cloud Strategy, and Cloud Engineering.
